

NIHAR MILIND PADAVE

FULL-STACK SOFTWARE DEVELOPER | REACT, PYTHON & TYPESCRIPT

+91-7021148404 | niharr2806@gmail.com | github.com/NIHAR-2812 | linkedin.com/niharpadave281206 | [niharpadave-portfolio](https://niharpadave-portfolio.com)

PROFESSIONAL SUMMARY

Dynamic Full-Stack Software Developer and Electronics & Computer Science undergraduate with a strong foundation in modern web technologies, including React, TypeScript, Python, and SQL. Experienced in architecting scalable backend APIs, designing intuitive UI/UX interfaces, and deploying full-cycle web applications. Proven ability to translate complex requirements into robust, high-performance solutions, demonstrated through successful client projects and sophisticated full-stack platforms.

EDUCATION

Shah & Anchor Kutchhi Engineering College

B.Tech in Electronics & Computer Science (SGPA: 8.3/10)

Mumbai, India

September 2024 – Present

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming

SKILLS

Programming Languages: Python, TypeScript, JavaScript, Java (OOP), C/C++

Frontend Technologies: React, Next.js, HTML5, Tailwind CSS, Bootstrap, Framer Motion

Backend & Databases: Node.js, FastAPI, Flask, MySQL, Supabase, Firebase, MongoDB

Cloud, AI & Tools: OpenAI API, Gemini API, Prompt Engineering, LLM Integration, AI Application Development, Docker, Nginx, Git, Vercel

Core Concepts: Machine Learning, Data Preprocessing, MVC Architecture, Relational Database Design

INTERNSHIPS

Software Development Intern

Zidio Development

Remote

May 2026 – Present

IoT Cloud Engineer Virtual Internship | [View Credential](#)

AICTE, EduSkills & AWS

Remote

Jul 2025 – Sep 2025

AI Track Intern (Cisco Skill-A-Thon) | [View Credential](#)

SAKEC Winter Internship Program

Remote

Nov 2025 – Dec 2025

PROJECTS

Lexify AI - LegalTech Platform ([GitHub](#))

- Developed the backend API gateway using Python and FastAPI to asynchronously process and parse complex legal documents.
- Integrated LLM APIs (Gemini/OpenAI) to evaluate contract clauses, flag predatory risks, and translate legalese into plain English.
- Engineered a robust text extraction pipeline utilizing PyPDF2, returning structured JSON risk assessments to the Next.js frontend.

SkyHigh Airways - Ticket Booking System ([GitHub](#))

- Developed a full-stack airline reservation system utilizing Python, Flask, and an MVC architecture.
- Engineered a robust relational database with MySQL triggers for automated seat generation and secure role-based access control.
- Designed an interactive frontend featuring real-time flight boards and a dynamic visual seat selection map with vanilla JavaScript.

Technix Timesheet Management System (Client Project) | [Live](#)

- Developed a production-ready timesheet system using React (TypeScript) and Supabase.
- Built dashboards used to manage 500+ timesheet entries, track analytics, and generate automated Excel reports.
- Deployed for real-time usage with structured data processing and seamless client accessibility.

Seattle Desi Broadcasting Platform (Live Web Project) | [Live](#)

- Built a responsive React-based web application with modern UI/UX practices and performance optimization.
- Deployed live for real-time accessibility, ensuring a seamless experience across desktop and mobile devices.

Elementum - Premium Agency Landing Page (Frontend Assignment) | [Live](#)

- Developed a high-performance React landing page with Tailwind CSS and Framer Motion for complex animations.
- Integrated Docker and Nginx to architect a production-ready deployment environment for maximum scalability.

Zorlytics - Financial Dashboard (Frontend Assignment) | [Live](#)

- Built a React-based financial dashboard with transaction management and data visualization.
- Implemented CRUD operations, global state using Context API, and local storage persistence.
- Designed dynamic insights system for spending analysis and role-based UI (Admin/Viewer).

Buildify - Digital Agency Web Platform ([Live](#))

- Designed and developed a modern multi-page website using HTML, CSS, and JavaScript.
- Implemented responsive UI with clean design and structured navigation.
- Focused on user experience and high-conversion layout design.

CERTIFICATIONS

- Infosys Springboard: Generative AI for All | [View Credential](#)
- Infosys Springboard: Artificial Intelligence for All | [View Credential](#)
- Data Analytics Job Simulation - Deloitte (June 2025) | [View Credential](#)
- Data Science with Power BI - ECS Department (June 2025) | [View Credential](#)

ACHIEVEMENTS

- Runner-Up - Python Skill-Based Lab Micro Project Exhibition (Feb 2026) | [View Credential](#)
